

my name is Emmy.

Before I met Sean Kelly my life consisted of.

- Severe headaches.
- problem's with my eye's
- neck problem's

My headache's were severe for many year's more than I can even remember and I was in the bed 3 to 4 day's a week. I was taking tablet's of all kinds but nothing worked. - I tried all the medical routes and alot of other treatment.

I was also born with both my eyes closed but had an operation to open them but my focus wasn't right I could only focus with one eye at a time and my other eye would be closed.

To cut a long story short my aunt told me about Sean but I didn't want to go to Sean because I tried so many and was always dissappointed but she made me promise I would try and believe me when I say it changed my life.

from the moment I first met Sean I have had so much relief my headaches are gone He worked on my eye's and I now focus with both my eyes @ the one time. I don't stand out anymore in the crowd I'm part of the crowd.

Sean has told me I am very sensitive to electricity and I have changed some things in my home and the change in me is amazing. But I am headache free for 3 months now and no more bed all day I can drive and go where I want. Sean has given me my life back.

I call Sean my Miracle man he laughs at me when I say this but he really has given me my life back plus he is also only ever a phone call away.

Thank you Sean always
Emmy

P.S I could never repay Sean for what he has done for me.
